

Speaker Profile

Abdul Hameed Abdul Kareem (Hameed Kareem)

Abdul Hameed Kareem is Head of Analytics at STRAT369 Consulting, where he leads data-driven engagements for government agencies and utilities, focusing on business intelligence (BI), data visualization, and strategy. With a background in economics, finance, and data science, Hameed brings over 15 years of cross-sector experience spanning government, academia, capital markets, and the private sector.

He has previously served in data leadership roles at the University of Nottingham Malaysia and the Asia School of Business, contributing to research, teaching, and strategic analytics. He was also an analytics consultant with dSilo, a New York-based AI startup, where he worked on contract analytics and fraud detection using Power BI and machine learning techniques.

Currently, Hameed is involved in the development of sector-specific analytics tools for the water sector, including interactive dashboards that consolidate operational and financial data from public sources to support regulatory and strategic decision-making. He also conducts training programs on water analytics, helping build analytical capacity across the sector through practical, tool-based workshops.

His work combines advanced analytics, domain knowledge, and storytelling to bridge data with decision-making. At MIWC 2025, he shares insights on how BI and Generative AI can transform data engagement in Malaysia's water sector.
