

Speaker Biography

Bahareh Joharinad is the Business Relationship Manager for EMEA and Southeast Asia at NIVUS GmbH, a leading German provider of flow measurement and water monitoring solutions. She holds an engineering background with specialized expertise in hydrology and water resource management, combined with extensive experience in the water industry.

Bahareh's role focuses on supporting partners, consultants, and contractors across Europe and Asia by developing strategic relationships and driving tailored measurement solutions for sustainable water projects. She has hands-on involvement in major infrastructure and digitalization projects, providing expertise in accurate field data collection to enhance digital models and operational efficiency.

With a deep passion for sustainability, Bahareh actively promotes data-driven approaches to address global water challenges such as non-revenue water, infiltration and inflow in sewer networks, and smart water systems. She has presented on international stages, including the SWAN Digital Water Conference in Berlin, and is engaged in driving collaborative solutions across markets like Malaysia, Thailand, and the Philippines.
