

Speaker Profile

Ir. Khor Tse Tong

Pengurusan Air Selangor Sdn. Bhd.

NRW Department

Ir Khor Tse Tong is a Professional Civil Engineer who has over 25 years' working experience. He has in-depth technical knowledge and experience in NRW management, pressure management, water distribution network operation & planning, and hydraulic modelling of water distribution network.

He started his career as design engineer in a consultant office mainly involved in civil and structural design for residential and commercial project development.

He then joined PABW Sdn Bhd for the Selangor NRW Reduction Project as a construction engineer, during which he gained initial experience in NRW Management. He continued to work in another NRW project in Sandakan Sabah with Salcon Engineering Bhd where he deepened his NRW exposure.

After the Sabah project, he joined Halcrow Water Services Sdn Bhd as technical manager delivering water network hydraulic modelling projects for water operator PBA Penang and SAJ Johor. His team had also delivered projects for UK clients under outsourcing oversea programs.

He has joined SYABAS since 2010 until present as the Head of NRW Section under Air Selangor. The past 15 years have seen him gaining valuable experience in NRW management, distribution networks planning, design and operation, management of the largest regional office operation, and capital projects planning and delivery.
