

PROFESSIONAL SUMMARY

Loga Sunthri Veeraiah is currently a Senior Executive at Sustainability Section of Strategic Planning & Transformation Division at the Suruhanjaya Perkhidmatan Air Negara (National Water Services Commission) (SPAN) Malaysia. SPAN is a technical and economic regulatory body under the Ministry of Energy Transition and Water Transformation (PETRA) which takes care of the provision of the water supply and sewerage services in Peninsular Malaysia and Federal Territories of Putrajaya and Labuan.

Loga has more than 20 years of experience, with the last 9 years with SPAN as a regulator of the water services industry. Loga is part of the team which pioneers Sustainability and ESG activities for SPAN and the water and sewerage services industry in ensuring that we leverage and cooperate towards green transitioning. These includes identifying needed transition towards resilience and sustainability, finding suitable GHG accounting and decarbonization strategies across the sector and concurrently translating these towards amplifying innovative and transformative water services industry. Loga's other endeavors includes championing risk assessment related activities, preparation and implementation of SPAN Water Safety Plan which imposes a KPI to water utilities to create and operationalize workable WSP's, dam water level monitoring and reporting, providing input into Integrated River Basin management (IRBM) and Total Daily Maximum Load (TMDL) and other relevant studies. She brings to the table experience on ESG, climate resilience, risk assessment and management for the water industry in Malaysia.

Previously, Loga has more than 10 years of experience in EHS management and regulatory consulting in various Asian countries, this includes Malaysia, Singapore, Brunei, Thailand, Myanmar, Vietnam and Indonesia. Loga has been involved in various scopes of regulatory services to our clients, including developing site suitability applications, regulatory database, compliance checklists, regulatory summaries, legal registers, legislative trend analysis, and local regulatory survey to clients. Other experiences include environmental due diligence assessments, regulatory support, compliance management, and permitting and site closure support for major clients in Malaysia. Latest efforts include sustainability related services, development of corporate sustainability reports, water foot printing and climate change programs for industries.

Extensive working experience with multinational companies including water services operators, water regulators in other countries, state water resources agencies, NAHRIM, various ministries, governmental agencies and departments including DID, DOE and oil and gas such as Shell, Talisman, Panasonic, Sanyo, Texas Instrument, Seagate, Khazanah, Kualiti Alam, UEME, Cabot Malaysia, Navis Capital, Hitachi, Seagate, BASF Petronas, Petronas, NBC Universal, Kualiti Alam., PPG, Schlumberger and many more. Loga is actively involved with downstream activities in Retail Stations, Petrol Service Stations, Depot, Refinery, and Pipelines for either acquisition, existing or divestment.
