

Biography of Melvin Chan – Managing Director of Dazztech Solutions Sdn Bhd

Experienced sales, marketing, and business development leader with over 20 years of expertise in engineering software solutions across the civil & environmental engineering and metalcasting industries. I specialize in driving business growth, market expansion, and strategic partnerships in major ASEAN markets, including Malaysia, Indonesia, and Singapore.

My expertise spans AI/ML-driven simulation, digital twin technology, and computer-aided design, manufacturing, and engineering (CAD/CAM/CAE) solutions. I have a proven track record of introducing cutting-edge technologies, optimizing workflows, and helping clients achieve operational efficiency and sustainability goals.

Passionate about innovation and technology, I thrive on solving complex industry challenges by integrating advanced engineering solutions with real-world applications. Whether working with water infrastructure development, environmental impact analysis, or manufacturing process optimization, I am committed to delivering value-driven solutions that enhance productivity and performance.
