

Speaker Profile

Iznul Muazim serves as the Asia-Pacific Sales Manager for Technologies at Mueller Water Products, where he leads the strategic deployment of advanced water technology solutions across the region. He brings over a decade of professional experience in international sales, business development, and the implementation of smart water projects.

His work centers on the integration of technologies including real time water quality monitoring, leak detection, pipe condition assessment, and pressure management systems to support utilities in enhancing water quality and reducing non-revenue water (NRW). Iznul is a strong advocate for data-driven, performance-based approaches to asset management and adoption of smart water innovations in water utilities.
